Vigil Export Import Trading Ltd is excited to present our collection of garden houses that serve as an ideal space for seasonal relaxation or storage for delicate plants and garden furniture. We use advanced technology and equipment from renowned global brands along with top-notch materials and resources to manufacture exceptional products.

Our garden houses are crafted from natural wood, a versatile material that blends effortlessly with any garden decor. We provide a diverse range of designs that cater to every style and preference, including simple windowless rooms to multi-room houses for seasonal living.

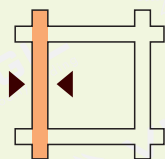

Our garden houses are lightweight, eliminating the need for a strip foundation and making installation quick and easy, even for those without professional construction skills. A screw pile or post foundation will suffice.

Our garden houses feature foundation beams measuring 44x68 mm, treated with antiseptic solutions to prevent decay. The walls are constructed from high-quality, profiled pine or spruce elements measuring 34/44x135 mm, and the roof and floor are made of durable, 20x115 mm wooden decking. Each garden house comes equipped with doors and windows, a roof truss system, and all necessary fittings and fasteners. Additionally, we provide detailed drawings and assembly instructions to ensure a seamless installation process.
